

Attention Hunters,

You can help shape the future of hunting in Manitoba by taking a few moments to complete this short survey.

Hunter Harvest Surveys (HHS) are vital to the management of Manitoba's game populations. Your feedback provides valuable information on harvest rates, success levels and hunting trends.

The **HHS** invites hunters to share their experiences, insights and passion for the great outdoors.

The newly redesigned survey is shorter and easier to fill out.

By participating in the **HHS**, you're influencing decisions on licence numbers, bag limits and season dates!

If you purchased a hunting licence in 2024, please fill out a survey for **each** licence you purchased, even if you did not hunt or harvest an animal. Individual responses are strictly confidential.

The Hunter Harvest Survey will be available for you to complete and submit until Monday, March 31, 2025.

To complete the HHS, log into your account by visiting manitobaelicensing.ca

Please count yourself in today!
