

AN ORDER OF THE CLEAN ENVIRONMENT COMMISSION  
UNDER THE CLEAN ENVIRONMENT ACT

RE: The Clean Environment Commission and Swift Canadian Company Limited, applicant.

WHEREAS pursuant to the provisions of the Clean Environment Act, Swift Canadian Company Limited, 738 Archibald Street, St. Boniface, City of Winnipeg, Manitoba submitted an application to the Clean Environment Commission to prescribe limits in connection with the operation of a beef and hog slaughtering and processing plant including inedible rendering and drying, located on the premises as indicated on the plan of the "St. Boniface Property Plan" attached to the application dated December 13th, 1971, in the City of Winnipeg,

AND WHEREAS a representation was made to the Clean Environment Commission by a person who is or is likely to be affected by an Order of the Commission prescribing limits in connection with the said operation,

AND WHEREAS the Clean Environment Commission held a public hearing on the 26th, 27th and 28th days of June, 1972 in the Archwood School in St. Boniface, City of Winnipeg, Manitoba,

AND WHEREAS the Clean Environment Commission considered the said application on the 22nd day of January, 1973 and issued Order No. 238,

AND WHEREAS the applicant submitted to the Clean Environment Commission a request for variation of the said Order,

AND WHEREAS the Clean Environment Commission held a public hearing on the 15th day of July, 1974 in the Board Room of Building 2 of the Fort Osborne Complex at 139 Tuxedo Avenue, Winnipeg for the purpose of hearing evidence in connection with the said request for variation of the said Order,

AND WHEREAS the Clean Environment Commission considered the request of the applicant for variation of the said Order on the 23rd day of July, 1974,

IT IS HEREBY ORDERED THAT ORDER NO. 238 BE VARIED TO READ AS FOLLOWS

1. The applicant shall, not later than the 31st day of December, 1974, install and set in operation equipment and facilities to effectively reduce malodour emanating from inedible rendering cookers and/or blood driers,

*Assignment remains the same as first order - J.D. Blaw*

2. The applicant shall ensure that on and after the 1st day of January, 1974
  - (a) gases and vapours discharged from inedible rendering cookers and/or blood driers to the air contain less than one hundred and fifty (150) odour units per standard cubic foot and that said gases and vapours are not diluted before measurement except as required
    - (i) to introduce combustion gases or chemical reactants necessary for odour abatement, or
    - (ii) to assure gathering of said gases and vapours,
  - (b) sampling points are provided in the exhaust system from the inedible rendering cookers and/or the blood driers in conformity with the requirements of the Environmental Protection Branch of the Department of Mines, Resources and Environmental Management.
3. The applicant shall ensure that on and after the 1st day of January, 1975 at any point of impingement off the plant premises the atmosphere contains less than seven (7) odour units per standard cubic foot, emanating from the said operation,
4. The applicant shall ensure that:
  - (a) all odour control and reduction equipment and facilities are maintained and in sound operating condition, and
  - (b) all odour control and reduction equipment and facilities are in operation whenever or however the said cookers and/or blood driers are in use,
5. The applicant shall ensure that general housekeeping and maintenance measures are of a standard that will meet the requirements in Clause 3 of this Order.

Order No. 238 As Varied

Dated at the City of Winnipeg

this 6TH day of September 1974

  
Chairman,  
Clean Environment Commission
