Attention: Edwin Yazon

Subject: Leachate Disposal for Waste Connections of Canada - Prairie Green Integrated  
Waste Management Facility (IWMF)

Dear Mr Yazon:

Prairie Green IWMF currently treats leachate on site using an evaporation pond. In the event of a failure with the onsite treatment system, or this system reaching its capacity, Waste Connections would need to use a water treatment plant as a contingency.

Please accept this letter as a formal request by Waste Connections of Canada for approval to dispose of leachate from Prairie Green IWMF at the City of Winnipeg's North End Water Treatment Facility.

If you have any questions regarding this request please do not hesitate to contact me at any time.

Sincerely,

Barry Blue  
District Manager  
Prairie Green Landfill  
Waste Connections of Canada
