SUBJECT: Review of Environment Act Proposal for Transcontinental Printing – Client File No. 5082.10

The Environmental Compliance and Enforcement Branch of Manitoba Conservation and Water Stewardship has reviewed the above noted proposal and would like to provide the following comment:

- Proponent should provide an updated project schedule following approval of their proposal.

DATE: 04 September 2014

SUBJECT: Transcontinental Printing 2005 – LGM Graphics Printing Operation (File 5082.10)

Air Quality Section has reviewed the above proposal and provides the following comments:

- The proposal provides only total annual VOC emissions from the printing press. It is recommended that details and assumptions on the VOC emissions calculations be submitted. It is also suggested that the proponent comply with the CCME Environmental Code of Practice for the reduction of VOC Emissions from the Commercial/Industrial Printing Industry for calculating and controlling VOC emissions from the facility.
- Although the source of VOC emissions are identified in the proposal, no speciation is provided, hence it is suggested that the VOC is characterized to identify the specific VOCs. This is important in order to identify the presence of VOCs listed under the Priority Substances List (PSL) of the Canadian Environmental Protection Act 1999 (CEPA 1999).
- There is no information provided regarding emission rates and predicted ambient concentrations. As the nearest residential area is ~200 meters away from the plant, it may be necessary to have these data to provide a meaningful assessment on the potential impacts to air quality. (Air dispersion modeling of the emissions may be necessary to estimate the potential ambient air concentrations in the facility's area of influence.)
- Air Quality Section recommends that the standard odour nuisance clause be included in the Licence.
