Dear Jocelan Lundquist:

Re: Husky Oil Operations Ltd - Minnedosa Ethanol Plant Alteration to Licence 2698 R.

Thank you for the Notice of Alteration dated April 1, 2021 in which you proposed installation of a primary corn oil separation system. In the proposed process a syrup produced from the evaporation system is centrifuged then transferred to a dryer to separate the corn oil. The primary corn oil separation system also involves the installation of a centrifuge, two indoor stainless steel insulated tanks and two outdoor heat traced stainless steel storage tanks with level sensors. It is understood that all spill containment and other safety mechanisms are in place that will accommodate the additional systems.

I have reviewed your alteration request and conclude that the environmental effects of the proposed alteration will be insignificant, and, therefore, in accordance with Section 14(2) of The Environment Act your alteration is approved as described in the April 1, 2021 Notice of Alteration.

If you have any questions, please feel free to contact Eshetu Beshada, Senior Environmental Engineer, Environmental Approvals Branch, at 204-250-1932, or by email at Eshetu.Beshada@gov.mb.ca.

Yours sincerely,
