Dear Mr. Oliver:

Re: Husky Oil Operations Ltd. Minnedosa Ethanol Plant – Alteration to Emission Monitoring

Thank you for the Notice of Alteration (NoA) submitted on February 26, 2016 in which you requested an amendment to Clause 27 of Environment Act Licence 2698 R issued to your ethanol plant in Minnedosa. The NoA proposes to change the air emission testing frequency from yearly to every two years. It is understood that the monitoring results for the last five years indicated that the plant meets all air emission limits as stipulated in the Licence.

Upon review of your alteration request, I have concluded that the environmental effects of the alteration will be insignificant; therefore, in accordance with Section 14(2) of *The Environment Act* your alteration is approved as described in the February 26, 2016 NoA. Accordingly, Clause 27 of the Licence is hereby amended as follows:

27. The Licencee shall conduct the following air emission testing, after reaching normal operation and biennially thereafter, unless otherwise approved by the Director, to demonstrate compliance with air emission limits using standardized methodologies:
- a) boiler: NON, CO;
 - b) ethanol absorption column: VOC; and
 - c) DDGS dryer: VOC, NON, CO.

If you have any questions regarding this matter, please contact Mr. Peter Crocker, Regional Supervisor, at (204) 726-6565.

Yours sincerely,

“original signed by”

Tracey Braun, M.Sc.
Director
