Winnipeg, MB R3C 1A5

Dear Ms. Braun:

RE: Bipole III Transmission Project (Licence 3055) – Route Adjustment

Pursuant to the Bipole III Transmission Project *Environment Act* licence 3055, this letter serves to request a revision to the recently approved route adjustment approximately 1.5 kilometres immediately north of the Assiniboine River crossing in construction segment S1. This adjustment involves the movement of one transmission tower 190 metres west on private land as shown on the attached map.

The proposed tower relocation is requested due to erosion and access concerns and moves the route westward closer to the original route. This route adjustment also reduces the slope steepness over which construction crews must navigate between towers 6197 and 6198.

The affected landowners have signed easements supporting this change. Swan Lake First Nation representatives have also expressed support for this change and have no concerns with the tower relocation.

Your timely response to this route adjustment request is very much appreciated.

Should you have any questions or require further clarification of our comments please do not hesitate to contact me at 204-360-4394.

Regards,
