**RE: Notice of Alteration, Environment Act Licence No. 3081 R, The Brady Road  
Resource Management Facility, Hog Disposal Above Ground Burial Pilot  
Project Client File No. 5556.00**

---

Please accept this letter as a Notice of Alteration to the above noted Environment Act Licence.

The City of Winnipeg has been in discussion with Manitoba Agriculture and Resource Development (ARD) about how to manage a possible large scale hog mortality event. Landfilling is a limited option for this type and potential volume of material. This proposal is for regulatory approval to pilot above ground burial for the management of hog mortalities under the following operating criteria:

- Above ground burial will take place with a restricted area of the facility.
- Odour, vectors and dust will be monitored and managed according to the requirements of the Environment Act Licence 3081 R.
- No equipment used for above ground burial will be used off site without decontamination.
- Material used in the pilot project will not leave the site.

This hog disposal above ground burial project pilot is a joint initiative with ARD.

Should you have any questions on this Notice of Alteration, please contact Chris Kozak at 204-986-2384 or by email at [ckozak@winnipeg.ca](mailto:ckozak@winnipeg.ca).

Yours truly,

  
Michael Gordichuk, CCLP  
Manager, Solid Waste Services
